	350 ft/min 1.75 m/sec	< 12.6 in < 320 mm	Chain PVC sheath	One year

Wire Rope, Compensation and Accessories

All products are available globally.

Note on loop widths:

Steady-Flex is made especially for installations with balance concerns such as side counterweights and long hanging lengths.

Easy-Balance has a narrow loop width similar to compensation chains.

Draka Elevator can help you determine which size of Whisper-Flex, Steady-Flex or QuietLink II cable to use.

Call 1-877-372-5237 or +1-252-984-5100 and have the following information ready:

- 1) number of hoist ropes per car
- 2) outer diameter of the hoist ropes
- 3) stranding of the hoist ropes (i.e. 8x19, 8x25...)
- 4) car roping (i.e. 1:1, 2:1, other...)
- 5) number of Whisper-Flex cables per car
- 6) length of Whisper-Flex cable needed.

If replacing existing compensation, have ready the chain link size or cable brand name and outer diameter.

The Whisper-Flex strip kit makes preparing compensation cables easy. See page 94 for details.
